

28 - 30  
APRIL 2016

**BULLETTIN**  
**N.1**

Welcome !!!

Dear Yachts Owners

C.U.S. Bari is proud of having reached the XI edition of the race that has seen us together sharing the success of this event.

Our thanks go to all those who have always been providing their time, skills and professionalism in the organization of the race.

We have been working with passion to make the race EST 105 an important event in the Adriatic Sea. We reconfirmed the collaboration with the CLUB J. Grakalic but we are also very pleased of having signed an agreement with the Yachting Club Porto Montenegro in Tivat. Such an agreement beside regarding club relations, will allow us to program the next editions on more solid bases.

Our thanks go to You all since, together with institutional sponsors like Olivetti d'Italia or those who supported us in the various editions, you have made our event special and successful.

We are confident that, in the bend of St. Nicholas on the start line April 28, 2016 there will be so many of you to render this event unique.

I'll wait for you!!!

Best Regards

*Giuseppe Seccia*  
*Chair 2016 EST 105 Organizing Committee*

19:00 Welcome cocktail MNE

### SATURDAY 30 APRIL

19:30 Trophy Ceremony and Crew Party

20:00 Crew Party

## Bari

The capital of Apulia and an important touristic destination and commercial harbour, Bari lies on a fertile coastal plain facing the Adriatic Sea.

The landscape of the Murge Plateau, where time seems to stand still, stretches further inland. Timeless panoramas reveal a bare landscape whose sameness is broken up by rocks, hollows and ravines. Wide open spaces have adapted themselves to man's needs over the centuries, and even dried-up river beds have become farmland. Olive and almond trees and vineyards paint the vast expanse of the plateau in intervals, where one finds ancient masserie (farmhouses) that long ago served as a means of defence against raids.

Bari, cultural crossroads since ancient times, is an ideal starting point, a city where two souls meet: the old town, surrounded by an imposing wall and crossed with narrow streets that lead to the discovery of its rich heritage; and the modern city, built at the beginning of the 19th Century and having endured several changes over time.

### Geographic position

Sud Est Italia

41° 7'31"N, 16°52'00"E

### Climate

The city is characterized by a Mediterranean climate, with continental and hot, dry summers mild winters .

### Temperature

In April it varies from 18 ° C to 30 ° C

### Population

370.000 inhabitants

### Other information

Capital of the Metropolitan City

Capital of the Apulia Region

## Kotor Bay

The bay is about 28 km long with a shoreline extending 107.3 km.

It is surrounded by two massifs of the Dinaric Alps: the Orjen mountains to the west, and the Lovćen mountains to the east. The narrowest section of the bay, the 2300 m long Verige Strait, is only 340 m wide at its narrowest point. The bay is a ria of the vanished Bokelj River that used to run from the high mountain plateaus of Mount Orjen.

The bay is composed of several smaller broad bays, united by narrower channels. The bay inlet was formerly a river system. Tectonic and karstification processes led to the disintegration of this river. After heavy rains the waterfall of Sopot spring at Risan appears, and Škurda, another well-known spring runs through a canyon from Lovćen. The outermost part of the bay is the Bay of Tivat. On the seaward side is the Bay of Castelnovo, at the main entrance to the Bay of Kotor. The inner bays are the Bay of Risan to the northwest and the Bay of Kotor to the southeast.

The Verige Strait represents the bay's narrowest section and is located between Cape St. Nedjelja and Cape Opatovo; it separates the inner bay east of the strait from the Bay of Tivat.

### Geographic position

Nord West Montenegro  
42° 26'00"N, 18°38'00"E

### Climate

The city is characterized by a Mediterranean climate, with continental and hot, dry summers mild winters .
